

Contents

1 • Introduction to Intensive Longitudinal Methods	1
1.1. What Are Intensive Longitudinal Methods?	3
1.2. Applications of Intensive Longitudinal Methods	3
1.3. Why Use Intensive Longitudinal Methods?	5
1.4. Goals for This Book and Intended Audience	7
1.5. Organization of This Book	7
1.6. Recommended Readings	9
2 • Types of Intensive Longitudinal Designs	11
2.1. Strengths of Intensive Longitudinal Designs	11
2.2. Types of Research Questions	12
2.3. Types of Designs and Prototypical Examples	14
2.4. Limitations of Intensive Longitudinal Designs	21
2.5. Which Intensive Longitudinal Design Is Best for You?	22
2.6. Chapter Summary	24
2.7. Recommended Readings	24
3 • Fundamentals of Intensive Longitudinal Data	27
3.1. An Example Dataset	28
3.2. Between-Subjects and Within-Subjects Levels of Analysis	29
3.3. Allowing for Between-Subjects Heterogeneity: Random Effects	32
3.4. Taking Account of Time	33
3.5. How Many Independent Units Are There in Intensive Longitudinal Datasets?	36
3.6. Choosing an Appropriate Zero Point for X	37
3.7. Chapter Summary	39
3.8. Recommended Readings	39

4 • <u>Modeling the Time Course of Continuous Outcomes</u>	41
4.1. The Time Course Dataset	42
4.2. An Application of Linear Growth Curve Analysis	42
4.3. Example Write-Up of Time Course Data	56
4.4. Chapter Summary	64
4.5. Recommended Readings	65
APPENDIX TO CHAPTER 4	66
5 • <u>Modeling the Within-Subject Causal Process</u>	69
5.1. Conceptualizing a Within-Subject Causal Process	69
5.2. Example Causal Process Dataset	72
5.3. Multilevel Causal Model Linking Daily Conflict to Intimacy	77
5.4. Modeling a Process with Missing Repeated Measurements	88
5.5. When the Intervals between Measurements Are Unequal	92
5.6. Example Write-Up of Causal Process Data	93
5.7. Chapter Summary	100
5.8. Recommended Readings	101
APPENDIX TO CHAPTER 5	102
6 • <u>Modeling Categorical Outcomes</u>	105
6.1. Exploring the Categorical Outcomes Dataset	106
6.2. A Longitudinal Multilevel Model Linking Morning Anger to the Incidence of Daily Conflict in Couples	110
6.3. Implementation in SAS PROC GLIMMIX	114
6.4. Implementation in IBM SPSS GENLINMIXED	119
6.5. Implementation in Mplus	120
6.6. Chapter Summary	123
6.7. Recommended Readings	124
APPENDIX TO CHAPTER 6	125
7 • <u>Psychometrics of Intensive Longitudinal Measures of Emotional States</u>	127
7.1. Basic Ideas about Random Measurement Error	128
7.2. Making Use of Generalizability Theory	130
7.3. Making Use of Multilevel Confirmatory Factor Analysis	138
7.4. Chapter Summary	140
7.5. Recommended Readings	141

8 • Design and Analysis of Intensive Longitudinal Studies of Distinguishable Dyads	143
8.1. Motivation for Studying the Everyday Lives of Dyads	144
8.2. Methodological and Design Issues in Intensive Longitudinal Studies of Distinguishable Dyads	145
8.3. The Multilevel Model for Intensive Longitudinal Data from Distinguishable Dyads	149
8.4. Example Write-Up of Dyadic Process Study Data	164
8.5. Chapter Summary	171
8.6. Recommended Readings	171
APPENDIX TO CHAPTER 8	173
9 • Within-Subject Mediation Analysis	177
9.1. Single-Level Mediation to Multilevel Mediation	177
9.2. Empirical Example	180
9.3. Implementing Within-Subject Mediation in Statistical Software	182
9.4. Interpretation of Results	190
9.5. Chapter Summary	194
9.6. Recommended Readings	194
10 • Statistical Power for Intensive Longitudinal Designs	197
10.1. Approaches to Power	197
10.2. Power in Multilevel Models	199
10.3. Power for the Time Course Example	201
10.4. Power for the Causal Process Example	209
10.5. Power for the Categorical Outcomes Example	215
10.6. Power for the Dyadic Process Example	219
10.7. Power for the Within-Subject Mediation Example	222
10.8. Chapter Summary	226
10.9. Recommended Readings	227
